

BASEM MOSTAFA MAHMOUD MOSTAFA

MEAN|MERN DEVELOPER

Location: Giza, Egypt

Nationality: Egyptian - **Date of Birth:** June 16th, 1998

Email: basem.mostafa1698@gmail.com - **Phone Number:** +201092369774

Military Service: Completed (October 2020 – December 2021)

Official Education

- **Ain Shams University, graduated in 2020 (BA):**
 - **Faculty:** Faculty of Al Alsun (languages and translation)
 - **Major:** Slavic Languages and Literature, Czech Language division
 - **Minor:** German as a second language
 - **Overall percentage/grade/GPA:** 83.7% / Very Good / 3.35

Portfolio:

- **My Personal Portfolio (Web Project)** ([Go To Website](#)) ([Go To Codebase](#))
- **My GitHub Account** ([Go To Website](#))

Training & Internship

- **MEARN Development Intern at Information Technology Institute (ITI)**
(ITI/AAIB Academy Internship) (March 2022 – Now)
 - Projects:
 1. **BMDB – Movies Database (Web Project)** ([Go To Website](#)) ([Go To Codebase](#)):
 - A React app that acts as a movie database to browse through a large dataset of movies
 - The layout is brought to life using React, react-bootstrap, Redux, Redux Thunk, and Context
 - Axios is used to communicate with the external TMDB API
 2. **Medical Appointments Website (Web Project) (Team Project)** ([Go To Website](#)) ([Go To Codebase](#)):
 - A responsive full-stack web application built with the MERN stack.
 - My responsibilities as a full-stack developer in the team:
 - Design the landing page & “Our Specialists” page wireframes on Figma
 - Implement the doctor’s application multi-step form
 - Implement the doctor’s booking drawer component
 - Implement authorization/authentication strategy using JWT & http-only cookies
 - Implement a total of 35 endpoints for the 3 roles
 - Implement the API’s documentation using Swagger & swagger-express-ui
 - Deploy & maintain both the back end on Heroku and the front on Netlify
- **MEAN stack training at IT Share in Al-Dokki, Giza, Egypt** (August 2019 – November 2019)
 - Project:
 1. **Czech – English Word Game (Web Project)** ([Go To Website](#)) ([Go To Codebase](#)):
 - A word game for students of English and Czech to practice their vocabulary, keep track of new words learned and compete with the top 5 players to show off their vocabulary knowledge
 - Built using Vanilla JavaScript, CSS3, HTML, Node.js, Express.js and MongoDB
 - Mongo Atlas cloud (DBaaS) and Heroku (PaaS) were used as the cloud services needed

Courses & Achievements

- Participant at Huawei's Apps Up contest – Huawei MEA (July 2022 - Now)
- Web Development Professional Nanodegree - FWD Egypt Initiative (August 2020 – October 2020)
- JS Algorithms and Data Structures certification – FreeCodeCamp (December 2019 – February 2020)
- 1st place in the Czech creative writing contest – Czech department, the faculty of Al-Asun (March 2019)

Skills

1. Front-end

- Advanced JS, CSS3, and HTML5 (Experience with building large applications using vanilla languages)
- Experience with building SPAs using React and Angular.
- Experience with UI libraries such as Bootstrap and Material UI
- State management using Redux, and Redux Thunk.
- Familiarity with Sass and SCSS
- Familiarity with Responsive Web Design and the Mobile-First approach

2. Back-end

- Experience with building web servers in Node.js using Express.js
- Experience with error-handling techniques in Express.js
- Ability to work with both REST APIs and GraphQL
- Strong grasp of Backend development concepts (Authentication using sessions and JWT, Authorization, Encryption and Hashing, REST APIs)

3. Databases

- SQL (SQL Server, SSMS) (General knowledge of relational databases and ER diagrams)
- MongoDB (Mongo CLI, Mongo Atlas, Robo 3t) (General knowledge of non-relational databases)
- Database design and experience with ERDs

4. Unit Testing

- **Unit Testing using JEST, Mocha, and Jasmine**

5. Version Control

- Git CLI and GitHub

6. Agile Knowledge

- Jira and general knowledge of workflow tools and platforms
- Familiarity with the Agile mindset and principles
- Familiarity with SCRUM as the most popular methodology

7. Cloud Solutions (Hosting, setting up custom domains, handling DNS records)

- Heroku
- Netlify
- Cloudinary

8. Programming Paradigms

- Functional Programming
- Object-Oriented Programming

9. Operating Systems

- Linux (Debian-based distributions)
- Strong familiarity with both Linux Shell and Windows' Command Prompt

- **Languages: Arabic** (Native), **English** (Fluent), **Czech** (Intermediate)
